To,

State Coordinator and Convener,

UP Bio Energy Board,

Lucknow.

11/8/2020

We have formed FPO by our investment and right now we have achieved turnover of 2.5Cr., when our site was visited by Mr. K. V. Raju along with Mr. P. S. Ojha. Under their guidance we started working for farmers by providing them technical knowledge of how to do farming and get their products value added. We also trained them to minimize chemical inputs in their field and we have provided organic manure, neem emulsions, Rhizovium culture and other organic products. All this information was provided by Jai Urja Board under their guidance, we have installed 1000 cubic meter Bio Gas plant, Tissue culture lab, Steam distillation plant for essential oils, jagre plant and Color sotex for seed separation. In this timeframe we have introduced 800 farmers in our farmer producer company. We are thankful to Jai Urja Board for providing and updating us, with this we have achieved these things. Recently we're working for Krashi Shakti Karan Pariyojana in which we have already formed 20 clusters each of 25 acres in which were planning to grow lemon grass, vitver(khas), and palmaroza. In some area were planning to plant bamboo and khajoor.

Under the guidance of this esteemed organization we hopefully will be able to help farmers by providing them farming technologies, latest equipment, and value addition of their products. Recently our plant was visited by GMDIC & Director of Industries Mr. Govind Raju has provided us Raji Seeds which was bought by him from Bangalore and was provided to us for farmers and after going these valuable seeds they should be planted in large area.

We are very much thank full for his co operation.

Thanking you,

Raghuvansh Agrotech Farmer Producer Company Pvt. Ltd,

Rahul Sachan
